

Similar 3D Figures

Length
 $1:2$

Area

$1:4$

$$= 1^2:2^2$$

Volume

$1:8$

$$= 1^3:2^3$$

In general for similar figures

Length

$a:b$

Area

$a^2:b^2$

Volume

$a^3:b^3$

Warning In similar figures angles are preserved.

They are the same in both shapes

Simple examples

1) A model car is built based on real car with a scale 1:12

If real car has length 4m what length is the model car?

$$\text{Model Length} = 4 \times \frac{1}{12} = \frac{1}{3} \text{m}$$

If model bonnet has area 240 cm^2 , find area of real bonnet

Length	1 : 12	
Area	$1^2 : 12^2$	= 1 : 144
Vol	$1^3 : 12^3$	= 1 : 1728

$$\begin{aligned}\text{Real bonnet} &= 240 \times 144 \text{ cm}^2 \\ &= 34560 \text{ cm}^2 \\ &= \frac{34560}{10000} \text{ m}^2 = 3.456 \text{ m}^2\end{aligned}$$

Exam type question.

Jugs A and B are mathematically similar

The base of Jug A has an area of 16 cm^2 and the base of Jug B has an area of 25 cm^2

If Jug A is 24 cm tall, find height of Jug B

If Jug B has a volume of 375 cm^3 , find volume

of Jug A.

A : B

Area ratio 16 : 25

Length ratio $\sqrt{16} : \sqrt{25}$

= 4 : 5

Volume ratio = $4^3 : 5^3$

= 64 : 125

Height of Jug B = $24 \text{ cm} \times \frac{5}{4} = 30 \text{ cm}$

Volume of Jug A = $375 \times \frac{64}{125} = 192 \text{ cm}^3$

Exercise 14D Page 324 Blue Books

2) Length 4 : 7

a) Area $4^2 : 7^2 = 16 : 49$

b) Volume $4^3 : 7^3 = 64 : 343$

4) a) Height ratio 1 : 2

b) Volume $1^3 : 2^3 = 1 : 8$

c) Volume of larger glass = $1 \times \frac{8}{1} = 8 \text{ pints}$

d) Unfair since eyes perceive volume which

is 8 times bigger not 2 times bigger

1)

Length	$2:5$
Area	$2^2:5^2 = 4:25$
Volume	$2^3:5^3 = 8:125$

3)

Lin Scale	Lin Ratio	Lin fraction	Area Scale factor	Volume Scale factor
2	1:2	$\frac{2}{1}$	4	8
3	1:3	$\frac{3}{1}$	9	27
$\frac{1}{4}$	4:1	$\frac{1}{4}$	$\frac{1}{16}$	$\frac{1}{64}$
5	1:5	$\frac{5}{1}$	25	125
$\frac{1}{10}$	10:1	$\frac{1}{10}$	$\frac{1}{100}$	$\frac{1}{1000}$
7	1:7	$\frac{7}{1}$	49	343
$\frac{1}{5}$	5:1	$\frac{1}{5}$	$\frac{1}{25}$	$\frac{1}{125}$
$\frac{1}{2}$	2:1	$\frac{1}{2}$	$\frac{1}{4}$	$\frac{1}{8}$
